

M_SAFER, all the elements ...

ANTIMICROBIAL SCREEN

PROTECT YOUR WORKSPACE

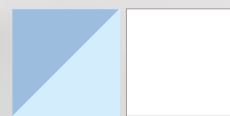

[M_SAFER]

It can be positioned on any counter or surface thanks to its self-supporting structure. This special screen **protects counter operators from contact with the public**, preventing possible exchanges of microbes.

The basic module is composed by a **transparent acrylic panel and two white metal supports**.

Compositions of modules are created by adding **side elements and connectors**.
